

CREDENTIALLED TESTER

*****WE ARE NOW A CARB (CALIFORNIA AIR
RESOURCE BOARD) INSPECTION STATION*****

California's Clean Truck Check Clean Truck Check is designed to ensure trucks operate at maximum efficiency for the life of the vehicle and to help California meet its air quality standards.

The program is similar to California's Smog Check Program for light-duty vehicles but provides more flexibility for heavy-duty vehicle owners and operators. Heavy-duty vehicle owners will complete the required test and deliver emissions systems inspection information remotely without having to travel to designated testing locations.

Clean Truck Check requires all diesel and alternative fuel trucks and buses with a gross vehicle weight rating (GVWR) over 14,000 pounds, including out-of-state and out-of-country vehicles, California motorhomes and agricultural vehicles, to:

- be regularly tested to ensure all emissions-related equipment is functioning properly.
- report the testing data to CARB.
- pay a compliance fee of \$30 per year per vehicle.

Testing Frequency

- OBD-equipped vehicles: 2 times per year, increasing to 4 times per year after 3 years.
- Non-OBD equipped vehicles: 2 times per year.
- Agricultural vehicles and California registered motorhomes: Once per year.
